

PRODUCT

Disposable ESD Wrist Strap

TECHNICAL DATASHEET

DESCRIPTION

Disposable wrist straps are designed for users who temporarily need an ESD wrist strap without the requirement of being durable or reusable. Individually bagged and complete with instructions, the strap can be shipped with components and devices for assembly eg. memory upgrades, servers components, circuit boards etc.

A hypoallergenic adhesive provides 360-degree contact, reducing skin-to-band resistance by its conductive element fabricated into the plastic ribbon. At the other end of the strap, the adhesive copper foil attaches to any convenient electrical ground. Once removed the adhesive will leave no residue behind on newly assembled products.

FEATURES

- Low cost, static control that can be shipped with your product
- 1.5m total length
- Fully adjustable wrist loop - no messy adhesives
- Copper foil for ground connection - no tape residues left on equipment
- Each wrist strap is packaged individually with instructions
- Wrist straps are individually bagged - supplied either each or in packs of 25

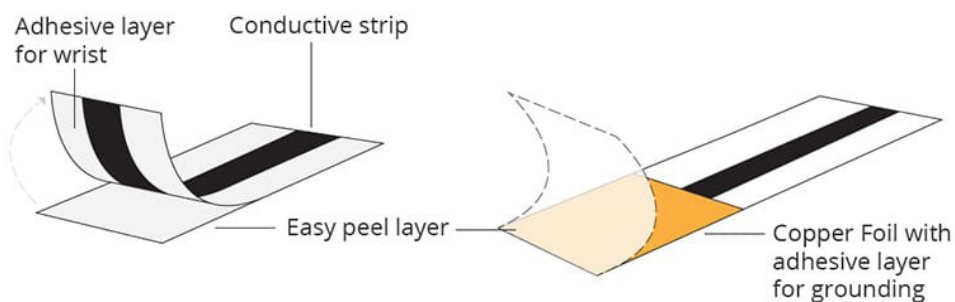

PRODUCT CODE	DESCRIPTION	NOTES
066-0052	Disposable ESD Wrist Strap	Each
066-0064	Disposable ESD Wrist Strap	Pack of 25

SPECIFICATIONS

Length	1.5m (4.9ft)
Resistance	1 Megaohm
Packaging	Individually bagged

1

Remove wrist strap from external packaging.

2

Peel back to reveal adhesive layer.

3

Place the tacky side on wrist.

4

Ensure wrist is covered and the black conductive strip is against the skin.

5

Peel back to reveal copper foil layer at the other end.

6

Fix the copper foil to your grounding point.
