SIZING METRIC

NOTE: The manufacturer makes appropriate allowances to the actual measurement given. e.g. if a 116cm chest is measured the actual finished garment will measure 122cm (the standard allowance for movement)

CHEST

A Measure around the chest at a point approx 3cm under the arms

B ARM LENGTH (Centre back to sleeve C-B-T-C)
Measure from the mid-point of the shoulders 16cm down from the base of the collar (called the centre back) and then measure from that point all the way across and down to the sleeve end

C LENGTH (Coat)
Measure from the base of the back of the collar down to the length required

D LENGTH (Coverall)
Measure from the back base of the collar to the end of the crotch

E LEG : Measure from inside of crotch to required length

F WAIST (Trouser) Full waist
